

Laser Therapy

The Problem Solver on Your Team

companion®

The Experience is the Difference

Why Treat with Laser Therapy?

Laser therapy provides you with a versatile, technician-driven tool that is a trustworthy adjunct to existing treatments and can generate clinical victories on hard-to-treat conditions where pain and inflammation are present.

Treatments are non-invasive, drug and surgery-free and can be administered in 1-10 minutes. Clients enjoy being involved with their pet's treatment as they see their loved one quickly relax as their pain is soothed away.

Companion Laser Therapy

As the nimble problem-solver on your team, laser therapy (photobiomodulation therapy), is fast-acting and versatile. This doctor-prescribed, technician-driven modality effectively treats a wide variety of conditions including pre-surgical, post-surgical, acute, and chronic disease states. Wow your clients with this proven therapy that wins favor with fast results, non-invasive delivery that patients enjoy. And did we mention cute eyewear that clients love?

Clinical Applications

- Reduce pain and inflammation from acute/chronic conditions
- Infections
- Dental procedures
- Sprain and strains
- Post-surgery
- Osteoarthritis
- Inflammatory bowel disease
- Degenerative joint disease
- Fractures
- Wound and lick granuloma

CTX-IQ

CTX-IQ, companion's flagship platform combines advanced software, dosing technology, and implementation support programs to provide you with the most turnkey laser therapy solution ever.

CTX

Companion's CTX therapy laser is ideal for both the entry-level and experienced user. The combination of intuitive software and SmartCoat™ Plus Technology ensure you easily achieve consistent clinical outcomes, every time.

EMPOWER IQ

THE SMARTEST WAY TO TREAT

QUICK RELEASE

Treatment attachments are easy to quickly attach and remove between treatments.

SPEED GUIDANCE

LED surrounding the on/off button visually indicates when the handpiece is being moved at the recommended speed.

-  Within Treatment Recommendations
-  Modify treatment
-  Outside Treatment Recommendations

PROTOCOL

Pre-set protocols recommend which treatment head attachment is optimal for the selected condition based on SmartCoat Plus parameters.

ACULATE DOSING MADE EASY...

Deliver the most accurate dose of laser energy with the guidance of the Empower IQ. The combination of optimal rate of handpiece movement, treatment head recommendations, and detailed species-specific protocols result in your most consistent therapy laser treatment ever.

HAPTIC FEEDBACK

Handpiece tactilely indicates when the scanning technique is not being administered at the recommended speed by gently vibrating.
